The VHQC PTN will be working with primary care clinicians in Virginia and Maryland. We will be providing technical assistance support to help equip them with tools, information and network support needed to improve quality of care, increase patient’s access to information, help people live healthier lives, and spend healthcare dollars more wisely. VHQC will assess each practice to determine which phase of practice transformation they are in and tailor our support to assist them through each of the five phases.

Clinicians who join the VPTN will:
- have an opportunity to be recognized as a national healthcare leader;
- Increase quality of care, decrease resource utilization through PQRS and Value-Modifier programs;
- Compare their data to other providers on a national/regional level; and
- have access to a community forum with peers and subject matter experts.
